

CLARVIE PRECISE MULTI-PILL SPLITTER

User Guide & Personal Medication Log

1. QUICK START GUIDE

1 Turn Dial to Open

Rotate the side dial counter-clockwise to open the adjustable holding clamps fully.

2 Place Pills in Tray

Position pills flat against the tray lining in a neat row.

3 Turn Dial to Secure

Rotate the dial clockwise to lock the clamps firmly around the pills.

4 Close & Press Cut

Close the lid and press down firmly to split all pills simultaneously.

2. PILL COMPATIBILITY & CUTTING OPTIONS

Supported tablet sizes: approximately 3 mm to 12 mm (product examples may range from 2.5 mg to 480 mg depending on tablet formulation). Adjust the clamps so tablets are held firmly without crushing.

Large Pills (up to 12 mm)

Widen the clamps fully before inserting. Place tablets flat and centered before tightening.

Medium Pills

Adjust the dial until the arms rest snugly against the tablet edges for a centered cut.

Small Pills (down to 3 mm)

Tighten inward carefully to reduce slipping. Do not overtighten fragile tablets.

3A. SLICING INTO HALVES (1/2)

1 Position & Align:

Place tablets in the tray. Align score lines, if present, parallel with the center blade slot.

2 Clamp Steadily:

Turn the side dial until the grips hold tablets firmly in place.

3 Press Cover:

Lower the lid and press down smoothly and firmly in one motion.

Cut 1/2

3B. CUTTING INTO QUARTERS (1/4)

1 First Cut (Halves):

Follow the half-cut steps to make two equal pieces.

2 Re-orient Halves:

Rotate each half 90 degrees. Rest the flat cut edge securely against the tray or clamp.

3 Clamp & Cut:

Re-clamp the half-pieces, close the lid, and press down firmly.

Cut 1/4

4. SAFETY GUIDELINES & CARE

WARNING - DO NOT SPLIT UNLESS CONFIRMED SAFE

- Enteric-coated (EC) tablets unless specifically approved for splitting.
- Extended-, sustained-, or time-release tablets (ER, XR, SR, LA) unless your pharmacist confirms they may be divided.
- Capsules or fragile/unscored tablets that crumble or do not divide evenly.

IMPORTANT USE & HYGIENE REMINDERS

- Ask a pharmacist or healthcare provider before splitting prescribed medication.
- Clean the tray and contact surfaces regularly to reduce cross-contamination.
- Keep fingers away from the internal blade; store the splitter closed and out of children's reach.

5. BEFORE EACH USE

- Confirm the medication is approved for splitting and check the prescribed split ratio.
- Inspect the blade, tray, dial, and clamps for damage, residue, or moisture.
- Place the splitter on a clean, dry, stable surface and ensure tablets lie flat.
- Use tablets of similar size in the same cutting batch when possible for steadier alignment.
- Discard or re-check pieces that crumble or split unevenly before taking them.

6. CLEANING & STORAGE

- After use, remove loose tablet particles from the tray and clamp surfaces.
- Wipe accessible surfaces with a clean, slightly damp cloth, then dry completely before closing.
- Do not place fingers directly near the cutting blade or use abrasive tools on the blade area.
- Clean between different medications when cross-contact could be a concern.
- Store closed, dry, and out of reach of children and pets.

CLARVIE PRECISE MULTI-PILL SPLITTER

Personal Medication & Splitting Tracker

HOW TO USE THIS TRACKER

Record the tablet name, full strength, tablet shape/size, intended split ratio, resulting dose, schedule, and any pharmacist or prescription notes. Use one row per medication.

WEEKLY NOTES & FOLLOW-UP

Questions for Pharmacist / Healthcare Provider

Record questions about whether a tablet can be split, dosing, timing, or storage.

Refill / Supply Notes

Track refill dates, low supply, prescription changes, or replacement splitter needs.

IMPORTANT

This log is for personal organization only and does not replace medication instructions. Do not change a dose or split a tablet unless a pharmacist or healthcare provider has confirmed that doing so is appropriate for that medication.
